

FLY CONFIDENT

MRO, PARTS, SALES

ABOUT US

WHO WE ARE, OUR MISSION, VISION AND VALUES

Setting the standard in aviation excellence since 1992, we are a New Zealand based general aviation MRO, Parts and Aircraft Sales provider. Recognised regionally and globally for our work, we have passionate professionals at the helm, ensuring trust in the comprehensive and specialist services we deliver for rotary and fixed-wing aircraft.

Oceania Aviation is a Part 145 and Part 148 organisation providing unprecedented and seamless support throughout New Zealand, Australasia and beyond. We have nine facilities in five geographic regions across New Zealand plus overseas representatives who further expand our reach.

The company ethos of safety, integrity and experience ensure our customers' needs are primary and they profit from our success and future growth.

Our experience and expertise has lead to key relationships with leading aviation manufacturers including Bell, MD Helicopters, Cessna, Diamond, Robinson, Lycoming, Continental Aerospace Technologies, Garmin and more.

Our Vision

We are committed to be a leading aviation company driven by integrity and trust. Connecting the industry with excellent services, products and uncompromised safety.

Our Mission

To provide each and every one of our clients with a personal service that offers peace of mind, complete satisfaction and the ability to fly with confidence.

Our Values

Every interaction with our team should reflect our values for honesty, integrity, safety and professionalism, ensuring each experience reflects quality and inspires confidence.

OUR HISTORY

1992

After the sale of a set of Main Rotor blades, Josh Camp and Jonathan Bowen register International Heliarts Limited.

1996

International Heliarts purchases Marine Helicopters, moves to Ardmore Airport and is renamed Oceania Aviation. Helicopter operations begin.

2005

Turbine overhaul facility is opened at Ardmore Airport Auckland and gains NZCAA approval.

2006

Helifix Component shop is acquired and becomes Helicopter components division.

2008

Aeromotive & Engine Components are acquired, expanding reach, adding fixed wing capabilities. Helicopter operations cease and Gordon Luke joins as a Director.

2012

Blade & Composite Structures facility is opened at Ardmore Airport Auckland in affiliation with ACS and the Queenstown Branch is opened.

2013

New, purpose built Turbine facility is completed at Ardmore Airport Auckland. Rebranding to represent both fixed wing and helicopter services.

2014

Flightline Aviation & Skysales are acquired, adding three additional facilities, one in Auckland, Dunedin, Christchurch.

2017

Nelson based Helicare Maintenance is acquired. Salus Aviation merges with Oceania Aviation.

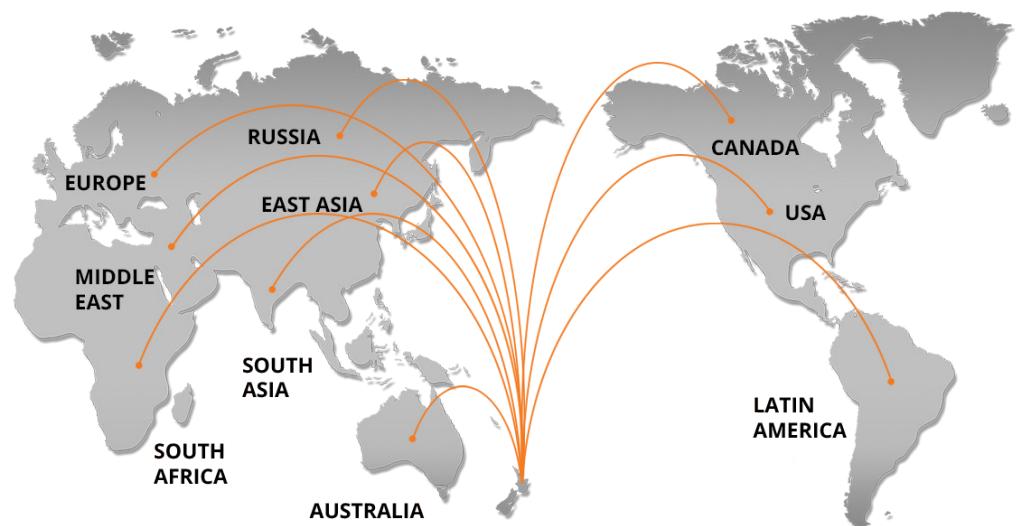

2018

Oceania Aviation named as Bell Customer Service Facility.

8 MILESTONES & MEMORIES

OUR REACH

We are a leader in the international market, with an unlimited reach and influence extending from our aircraft sales, overhaul of components and engines, composite and blade repairs, role equipment manufacture, training, and partnerships with offshore businesses.

OUR SPECIALITIES

WHAT WE DO

Through acquisition, expansion and strategic hires we have steadily increased the specialty services offered at our Oceania Aviation locations across New Zealand. With the end users' requirements as our focus, we provide our clients with solutions for all of their aviation needs while maintaining the highest standards of quality and safety.

Aircraft Sales

New & Used

Our mobile and dedicated sales team have an expert understanding of the aviation industry. With transparent and reliable business practices our sales team are responsible for driving company growth through sales worldwide. Experienced in general aviation and commercial operations ensure our sales team possess the knowledge and accessibility to relate to both sides of the market.

Continental Aerospace Technologies

CD-155 Engine

Diesel Engine Retrofit | Cessna & Piper

As Australasia's sole Continental Diesel Service and Installation Centre, we are aero-diesel specialists and can retrofit the CD-155 engine into all EASA and CM approved aircraft types and models.

Running on the cheaper and more readily available Jet A1 or Diesel, these retrofitted aircraft benefit from a fuel burn that is up to 38% more efficient than comparable AVGAS engines, offering significant savings to operators.

Propellers

Paint, Repairs & Overhaul

We provide complete overhaul and calendar inspections on all major propeller types for McCauley, Hamilton Standard, GT Propellers, Hartzell, Sensenich and MT Propellers. Three propeller shops throughout New Zealand, allow us to provide support to both New Zealand and international customers.

Dynamic Balancing

Cold Rolling

Shot Peening

Eddy Current Testing

Fixed-Wing Components

Servicing & Repairs

We offer an all-inclusive range of fixed-wing electrical and fuel system component solutions for the most popular GA aircraft. Based out of three specialist shops, our certified team provide our clients with quick access, ensuring fast turnaround times and reduced AOG.

With the only Cessna approved jigs in New Zealand and extensive experience in overhauling and repairing components, our team produce top results.
